DATA FOR **PROGRESS**

From October 24 to 27, 2025, Data for Progress conducted a survey of 1,235 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ±3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,235 unless otherwise specified.

[1] How much have you read, seen, or heard about each of the following **in the past year**?

— Cryptocurrency in general, such as stablecoin and other tokens

[3] Stablecoins are a type of cryptocurrency designed to maintain a steady value by being pegged to real-life assets like the U.S. dollar; however, stablecoins are lightly regulated and therefore, not protected and covered by FDIC insurance, as opposed to deposits in traditional banks that are tightly regulated and protected.

Knowing what you know now, how concerned are you, if at all, about people who have invested in cryptocurrency losing their money because of the lack of government regulation and insurance?

[5] When thinking about more customers moving their deposits from banks or credit unions to cryptocurrency like stablecoin, which of the following statements comes closer to your view, even if neither is exactly right?

Response	Topline	Democrat	Inde-pendent / Third party	Repub lican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
This will hurt local economies. It will limit credit availability (such as access to car, home, agricultural, or small business loans) in rural and underserved areas, because banks or credit unions rely on customer deposits to provide credit to the community.	65	71	68	58	68	62	54	70	63	68	48	71	45
This will help local economies. It could create new ways for households and small businesses to borrow, save, and invest outside of traditional banking institutions through digital lending and decentralized finance.	20	16	18	26	15	27	33	14	20	22	36	16	37
