

DATA FOR **PROGRESS**

From May 30 to June 1, 2025, Data for Progress conducted a survey of 1,232 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ± 3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,232 unless otherwise specified.

[1] As you may know, in 2022, the federal government established the 988 Suicide and Crisis Lifeline, which allows anyone in a mental health crisis to call or text 9-8-8 and be connected with a trained counselor. The 988 Lifeline also offers specialized crisis services for LGBTQ+ youth, a population at higher risk of suicide, in which they can connect with crisis counselors who have been specifically trained to support them.

The federal government is considering whether or not to eliminate the 988 Lifeline's specialized crisis services for LGBTQ+ youth. Do you think the U.S. government should eliminate these services or keep them in place?
