

DATA FOR PROGRESS

From March 27 to 30, 2026, Data for Progress conducted a survey of 1,228 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ± 3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,228 unless otherwise specified.

[1] Do you think the Trump administration has done enough to explain why the U.S. is at war with Iran?

[3] The Trump administration recently requested \$200 billion in additional funding for the Department of Defense to fund the war in Iran.

Do you think this funding should be used for the war in Iran, or for domestic social programs like health care?
