

# DATA FOR PROGRESS

From April 17 to 20, 2026, Data for Progress conducted a survey of 1,085 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ±3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit [dataforprogress.org/our-methodology](https://dataforprogress.org/our-methodology).

"Swing district voters" are those who live in a DCCC frontline district or DCCC district in play.

"Persuadable voters" are those who say they vote about equally for both parties.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,085 unless otherwise specified.

**[1a]** Lawmakers in Congress are proposing the following policies. For each policy, please say if you support or oppose it.

— Restricting private utility companies from passing unreasonable costs (like high debt, lobbying, fines, and penalties) onto customers and ensuring they prioritize investments to save costs
