

DATA FOR PROGRESS

From June 5 to 7, 2026, Data for Progress conducted a survey of 1,196 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ± 3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,196 unless otherwise specified.

[1] Would you support or oppose requiring large oil companies to pay a 50% tax on sudden and unusually high profits, such as during the U.S.-Iran war, and using this money to freeze or lower electricity rates for American consumers?

[4] The current U.S. military budget is about \$1 trillion per year.

President Trump has proposed providing a \$1.5 trillion budget to the U.S. military.

Which of the following statements comes closest to your view, even if neither is exactly right?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Asian	Black or African American	White	Latino
We should give the military a \$1.5 trillion budget. We need to make sure the U.S. military has all the funding it needs to protect our national security, especially with the Iran War.	46	25	43	69	48	44	37	51	49	42	23	35	50	38
We shouldn't give the military a \$1.5 trillion budget. Instead, we should spend some of that money on a huge buildout of domestic clean energy, which can better shore up our national security.	45	67	50	22	43	48	53	42	42	52	66	53	42	56
