Democrats in Congress	1%	34%	36%	15%	9%	5%
Republicans in Congress	1%	2%	5%	10%	16%	66%

This survey is based on 1,042 interviews conducted by YouGov on the internet of self-identified likely Democratic primary voters or caucus-goers. A sample of 2,750 interviews of self-identified registered voters was weighted according to gender, age, race/ethnicity, and education based on the American Community Study and the Current Population Survey Registration and Voting Supplement. Respondents were selected from YouGov to be representative of registered voters, and then the sample was subsetting to only include likely Democratic primary voters or caucus-goers. The weights range from 0.1 to 6.0 with a mean of 1 and a standard deviation of 0.5.

The *margin of error* (a 95% confidence interval) for a sample percentage p based upon the subsetting sample is approximately 3.4%. It is calculated using the formula

$$\hat{p} \pm 100 \times \sqrt{\frac{1 + CV^2}{n}}$$

where CV is the coefficient of variation of the sample weights and n is the sample size used to compute the proportion. This is a measure of sampling error (the average of all estimates obtained using the same sample selection and weighting procedures repeatedly). The sample estimate should differ from its expected value by less than margin of error in 95 percent of all samples. It does not reflect non-sampling errors, including potential selection bias in panel participation or in response to a particular survey.
