

DATA FOR PROGRESS

From December 16 to December 17, 2020, Data for Progress conducted a survey of 1098 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ± 3.0 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

[3] As part of a coronavirus relief bill, unemployed workers received an additional \$600 per week in unemployment insurance benefits such that the average worker would see 100 percent of their wages replaced. This program expired at the end of July.

Would you support renewing this program and leaving it in place for the duration of the pandemic?
