⊪ DATA FOR **PROGRESS**

From November 20 to November 22, 2020, Data for Progress conducted a survey of 1087 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±3.0 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

[1] Would you support or oppose forgiving $50,000 of student loan debt for every borrower?

[8] President-elect Joe Biden is considering using an executive order to forgive up to $50,000 of student loan debt for each borrower making less than $125,000 a year.
When thinking about this, which statement comes closer to your view, even if neither is exactly right?

Response	Topline	Democrat	Independent / Third Party	Repub lican	Female	Male	Under 45	45+	No College	College	Asian	Black or African American	White
He should forgive this student debt. In the midst of the coronavirus pandemic and an economic downturn, this is relief Biden can provide to roughly 50 million middle class families on day one -- without waiting for Congress to finalize a larger aid package.	45	67	41	26	52	38	54	40	44	48	59	64	41
He should not forgive this student debt. This could cost upwards of $1 trillion and when that much money is being spent it's important Congress be involved. Besides, this money is better spent elsewhere. Well-paid lawyers and doctors don't need a handout.	40	22	41	59	33	47	32	45	36	46	32	18	45
