

NB: subgroups with a n-size less than 100 (<100) are not shown on these cross-tabs. We choose not to display N<100 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

Lawmakers have proposed Medicare covering all healthcare costs for both insured and uninsured Americans for the duration of the coronavirus pandemic. Regardless of your current insurance status, would you rather have the government pay all of your out-of-pocket healthcare costs during the coronavirus pandemic, have the government subsidize your insurance premiums but not your deductibles, co-payments, and drug costs or have the government stay out of healthcare entirely?
