

NB: subgroups with a n-size less than 100 (<100) are not shown on these cross-tabs. We choose not to display N<100 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

Some lawmakers have proposed fully subsidizing the monthly premiums of employer-provided insurance for those who have lost their jobs, and now qualify for the COBRA program. However, this plan would not cover any costs associated with meeting the average deductible of \$1,800 before one's insurance kicks in. This plan also would not cover those previously uninsured. Would you support or oppose this policy?

Some lawmakers in Congress are proposing that Medicare will ensure that everyone in America, regardless of existing coverage, can receive the health care they need during this crisis. This includes coverage for all health care treatment for free, including coronavirus testing, treatment, and the eventual vaccine. Do you support or oppose this proposal?
