

NB: subgroups with a n-size less than 100 (<100) are not shown on these cross-tabs. We choose not to display N<100 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

In your opinion, what should the goal of federal assistance to businesses be: keeping companies afloat during the ongoing crisis or making sure that workers continue to be paid?

The Los Angeles Lakers, an NBA team, recently received federal funding through the recently created Paycheck Protection Program so that they can keep their employees on the payroll. Do you support this or think that they should pay the federal government back?

Congress recently passed legislation creating the Paycheck Protection Program. The program is designed for employers with 500 employees or less and provides funding to cover payroll and some business expenses. Do you think that if a business qualifies for funding but doesn't need it, they should take it?
