

## DATA FOR **PROGRESS**

From January 9 to January 10, 2021, Data for Progress conducted a survey of 1129 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is  $\pm 2.9$  percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

**[1]** On Wednesday, Sen. Josh Hawley voted to undermine the results of the 2020 presidential election. Politicians on both sides of the aisle have criticized him for his role in inciting the mob attack on the Capitol.

Some of the Senator's former supporters are cutting ties with his campaign. Do you think Corporate Political Action Committees and businesses should continue to support Hawley?
