

# DATA FOR **PROGRESS**

From December 11 to December 13, 2020, Data for Progress conducted a survey of 1263 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is  $\pm 2.8$  percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

**[1]** President-elect Biden has proposed issuing a directive for government contracts to prioritize buying sustainable and American-made products such as electric vehicles and green building materials.

Which statement comes closer to your view, even if neither is exactly right?

Response	Topline	Democrat	Independent / Third Party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	Hispanic or Latino/a	White
Biden should direct the federal government to prioritize buying sustainable and American-made products to support good-paying American manufacturing jobs and encourage private companies to produce more sustainable products.	69	84	69	53	70	69	68	70	65	76	72	61	69
Biden should not direct the federal government to buy sustainable and American-made products because the government should purchase what is most affordable to taxpayers, regardless of its environmental impact or where it was produced.	19	9	16	31	16	22	20	18	19	18	10	28	20
