📊 DATA FOR *PROGRESS*

From January 15 to January 19, 2021, Data for Progress conducted a survey of 1164 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±2.9 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

[1] The For The People Act has been introduced in Congress.
Supporters of the bill say it would limit the influence of big money in politics by empowering small donors; make voting easier and more secure; end gerrymandering; and give the public more information about who is lobbying our government.
Opponents say it would be an overreach by the federal government and that states should control their own elections.
Do you support or oppose the For The People Act?
