

# DATA FOR **PROGRESS**

From October 27 to 29, 2021, Data for Progress conducted a survey of 1,205 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is  $\pm 3$  percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,205 unless otherwise specified.

**[1]** Recently, Congress proposed plans to expand Medicare, such as including dental, vision, and hearing coverage. Lawmakers are also considering Medicare expansions that would cover treatments for Americans living with obesity.

Do you support or oppose expanding Medicare to cover treatments for obesity?
