

## DATA FOR PROGRESS

From February 3 to February 4, 2021, Data for Progress conducted a survey of 1215 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is  $\pm 2.8$  percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

**[1]** When thinking about coronavirus relief, is it more important to you that the bill include money for state and local governments or passed with bipartisan support?

**[2]** Some lawmakers in Congress are proposing that most Americans be sent \$1,400 stimulus checks as part of a coronavirus relief bill. This would be passed with support from only one party.

Other lawmakers in Congress are proposing that most Americans be sent \$1,000 checks. This would be supported by both parties. When thinking about both proposals, which statement comes closer to your view?
