

From January 29 to February 1, 2021, Data for Progress conducted a survey of 1124 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ± 2.9 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

[1] Some people think that we should be careful about how much money the federal government spends on economic recovery because of the federal debt burden it may put on future generations of taxpayers down the line. Other people think that the federal government should act to address major national problems like the pandemic, climate crisis, or long-term unemployment, and that it is riskier for future generations to inherit stunted economic growth. Which comes closer to your view?

Response	Topline	Democrat	Independent / Third Party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	Hispanic or Latino/a	White
It is more important that the federal government spend money now to ensure a healthy economy and planet for future generations.	56	77	53	32	58	53	62	52	57	53	73	64	52
The federal government should be careful not to overspend in order to protect future generations from national debt.	39	17	42	64	36	43	30	45	37	44	14	30	45
