

DATA FOR PROGRESS

From January 6 to January 11, 2021, Data for Progress conducted a survey of 1219 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ± 2.8 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

[1] pooled over 2 surveys As a response to the economic downturn the coronavirus pandemic created, President-elect Joe Biden is considering using an executive order to forgive up to \$50,000 of student loan debt for each borrower making less than \$125,000 a year.

When thinking about this, which statement comes closer to your view, even if neither is exactly?
