

From February 19 to February 22, 2021, Data for Progress conducted a survey of 662 likely voters in Arizona using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±4 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

**[9]** Some lawmakers in Congress are proposing providing those who qualify for unemployment benefits an extra \$600 per week for up to four months so that, combined with state unemployment benefits, they would have 100 percent of their wages replaced. These expanded unemployment benefits would then remain in place until unemployment falls back to pre-pandemic levels.

Do you support or oppose this proposal?
