пП DATA FOR **PROGRESS**

From March 21 to April 5, 2021, Data for Progress conducted a survey of 1007 likely Democratic primary voters in New York City using SMS and web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±3 percentage

NB: subgroups with a n-size less than 40 (<40) are not shown on these cross-tabs. We choose not to display N<40 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

[1] If the Democratic primary election for **New York City Mayor** was being held tomorrow, and these were the candidates, who would you vote for?
