

DATA FOR PROGRESS

From March 20 to 23, 2021, Data for Progress conducted a survey of 627 likely voters in California using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±4 percentage points.

NB: subgroups with a n-size less than 30 (<30) are not shown on these cross-tabs. We choose not to display N<30 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

This report is filtered to respondents: **CA**
