

## DATA FOR **PROGRESS**

From February 12 to 13, 2021, Data for Progress conducted a survey of 401 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is  $\pm 5$  percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

**[1]** Some lawmakers in Congress are proposing creating a **child benefit**, a program which would provide \$3,000 per year for each child under the age of 17 – and \$3,600 for young children under 6 years of age.

Would you support or oppose this proposal?
