📊 DATA FOR *PROGRESS* **OUR CITY**

From March 22 to April 1, 2021, Data for Progress conducted a survey of 509 likely Democratic Primary voters in New York City using SMS and web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±4 percentage points.

Questions in this document cover the following issue areas:

- Q1-2: Voter Decidedness
- Q3-9: Candidate Qualities
- Q10-12: Public Safety
- Q13-15: Housing
- Q16-19: Education
- Q19-23: Economic Recovery

Note: Question 1, certainty in Mayoral preference, is used as a crosstab in this document, not to be confused with Question 2 which uses a similar scale.

NB: subgroups with a n-size less than 46 (<46) are not shown on these cross-tabs. We choose not to display N<46 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

[1] Thinking about the June 22 primary elections, which of the following best describes your vote for mayor?

Response	Topline	Female	Male	Under 45	45+	No College	College	Black or African American	Hispanic or Latino/a	White	Already decided which candidates will be ranked at the top	Some preferred candidates, but the order might change	Undecided with no preferred candidates
