

From April 16 to April 19, 2021, Data for Progress conducted a survey of 1138 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points. N=1138 unless otherwise specified. Some values may not add up to 100 due to rounding.

N=572 unless otherwise specified. Some values may not add up to 100 due to rounding.

[1] Which statement comes closer to your view, even if neither is exactly right?	The U.S. needs to invest more in scientific and technological innovations. By investing in the technologies of the future, we can drive innovation and create new long-term jobs while maintaining our competitive edge over China.	66%	81%	69%	47%
	The U.S. does not need to invest more in scientific and technological innovations. This is a waste of taxpayer money and the private sector should be responsible for these innovations.	25	10	24	43

Technology is generally a force for good. Large tech companies have provided innovations like vaccines, electric vehicles, bringing down the cost of batteries that store green energy, vegetarian meat options, and other ways that have improved our quality of life. 71%	78%	77%	59%
Technology is generally a force for bad. Large tech companies are bad for workers, inequality, and democracy. The technological innovations they produce are not worth the cost. 19	12	14	30
