

From March 31 to April 2, 2021, Data for Progress conducted a survey of 1207 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

[1] The U.S. is facing a historic supply shortage of housing, especially in the nation's most in-demand regions. Some lawmakers in Congress are considering making funding for local infrastructure projects contingent on local governments adopting policies that encourage the building of new housing. Specifically, local governments would only get certain infrastructure dollars if they stop making it illegal to build multi-family housing. Do you support or oppose this proposal?
