

From May 28 to June 1, 2021, Data for Progress conducted a survey of 1,304 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

N=1304 unless otherwise specified. Some values may not add up to 100 due to rounding.

<b>[3]</b> Which of the following comes closer to your view, even if neither is exactly right?	We won't fully recover from the pandemic until other countries, who are struggling with Covid virus mutations, are also vaccinated. . . . .	<b>67%</b>	78%	68%	57%
	We are almost back to normal in the U.S. and don't need to worry about other countries' progress. . . . .	<b>27</b>	19	24	36
	Don't know . . . . .	<b>6</b>	4	8	7

		D	I	R	
<b>[4]</b> The Pfizer and Moderna vaccines have a limited shelf life and sometimes have been thrown away if they are not used after a certain amount of time passes. When thinking about this, which of the following comes closer to your view, even if neither is exactly right?	We should share extra vaccines we have with other countries, especially those that don't have the resources to manufacture vaccines. . . . .	<b>83%</b>	90%	81%	77%
	We should not share extra vaccines we have with other countries. . . . .	<b>11</b>	5	10	17
	Don't know . . . . .	<b>6</b>	5	9	6

**[5]** Recent reports show India is currently overwhelmed in its response to Covid infections, hospitalizations, and deaths. When thinking about this, which of the following comes closer to your view, even if neither is exactly right?

		D	I	R
We are lucky to be coming out of the pandemic in the U.S. and we should help other countries who are struggling. . . . .	<b>74%</b>	84%	73%	65%
The situation may be unfortunate but India has its own responsibility to take care of its people. . . . .	<b>21</b>	12	21	30
Don't know . . . . .	<b>5</b>	5	7	6

**[6]** When thinking about the global Covid vaccine efforts, which of the following comes closer to your view?

		D	I	R
The U.S. should help begin vaccinating the rest of the world immediately. . . . .	<b>28%</b>	42%	25%	14%
The U.S. should help vaccinate the rest of the world only after everyone in the U.S., including teens and children, who want a vaccine have gotten one. . . . .	<b>42</b>	43	41	42
The U.S. should help begin vaccinating the rest of the world only after the U.S. has reached herd immunity. . . . .	<b>16</b>	10	19	22
The U.S. should not help vaccinate the rest of the world. . . . .	<b>14</b>	5	15	22

**[7]** Do you support or oppose the U.S. helping global Covid vaccine efforts to vaccinate countries around the world?

		D	I	R
Strongly support . . . . .	42%	65%	35%	23
Somewhat support . . . . .	37	27	38	48

**[9]** Some organizations propose that the U.S. should be the leader in global Covid vaccine efforts to help vaccinate countries around the world.

Supporters of this proposal say that it could take some countries years to vaccinate everyone. We need countries around the world to be safe as quickly as possible so that we can focus on getting the U.S. economy and global economy back on track.

Opponents of this proposal say that it will be too costly to help the rest of the world get vaccinated, and there is no guarantee that the U.S. will benefit from this kind of investment. We should not help other countries get vaccinated.

Do you support or oppose the U.S. being the leader to help vaccinate countries around the world? (N=470)

**[10]** Some organizations propose that the U.S. should be the leader in global Covid vaccine efforts to help vaccinate countries around the world.

Supporters of this proposal say that even though infections in the U.S. are falling, the pandemic is not over. We have a moral obligation to help countries that don't have as many resources as we do where the virus is quickly spreading and mutating.

Opponents of this proposal say that it will be too costly to help the rest of the world get vaccinated, and there is no guarantee that the U.S. will benefit from this kind of investment. We should not help other countries get vaccinated.

**[11]** Some organizations propose that the U.S. should be the leader in global Covid vaccine efforts to help vaccinate countries around the world.

Supporters of this proposal say we've all faced the same challenges in lockdown. We should help other countries get the vaccines they need so they can be with families and loved ones, travel, and return to normal — just like we're starting to in the U.S.

Opponents of this proposal say that it will be too costly to help the rest of the world get vaccinated, and there is no guarantee that the U.S. will benefit from this kind of investment. We should not help other countries get vaccinated.
