

DATA FOR PROGRESS

From April 12 to 24, 2021, Data for Progress conducted a survey of 2,058 likely voters in New Jersey using SMS and web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ± 2 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

This report is filtered to respondents: **NJ**

[1] Some lawmakers in New Jersey are proposing a law which would provide monthly cash payments to New Jersey residents, regardless of employment status. This is commonly known as a monthly basic income. Supporters of this law say it will help Americans pay their bills, reduce poverty, and improve local economies. Opponents of this law say that we should focus on job creation and wage reform rather than handouts. Would you support or oppose this proposal?
