

From September 17 to 23, 2021, Data for Progress conducted a survey of 497 likely voters in Florida's 7th Congressional District using SMS and web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ± 4 percentage points.

N=497 unless otherwise specified. Some values may not add up to 100 due to rounding.

This report is filtered to respondents: **FL_007**

LESS LIKELY (TOTAL)	55	72	47	42
MORE LIKELY (NET)	-21	-49	-15	+9

[5] The Build Back Better plan is a \$3.5 trillion proposal that would expand Medicare benefits, lower healthcare costs and prescription drug prices, and expand access to affordable caretaking services for children and the elderly. This plan would also take action to address climate change and extreme weather, create clean energy jobs, and reduce pollution.

Some say that we should **increase** the amount of investments in the Build Back Better plan to provide more help to working families, address our economic problems, and take action on climate change now that will pay off in the long run.

Some say that we should **decrease** the amount of investments in the Build Back Better plan because we need to rein in government spending, even if it means cutting investments to help working families and address climate change.

Do you think lawmakers should increase, decrease, or keep the same amount of investments in the Build Back Better plan?

		D	I	R
Lawmakers should increase the amount of investments in the Build Back Better plan	35%	53%	28%	21%
Lawmakers should keep the same amount of investments in the Build Back Better plan	32	42	29	24
Lawmakers should decrease the amount of investments in the Build Back Better plan	32	5	43	55

[6] Which statement comes closer to your view, even if neither is exactly right?

		D	I	R
Lawmakers should pass the Build Back Better plan to cut pollution, lower energy costs, create new clean energy jobs, and tackle climate change to ensure we leave a sustainable world for future generations.	57%	92%	51%	21%
Lawmakers should not pass the Build Back Better plan. Government spending is out of control, and we should not raise the national debt and spend more taxpayer money on this proposal.	35	3	39	71
Don't know	8	5	10	8
