

# DATA FOR PROGRESS

From December 17 to 21, 2021, Data for Progress conducted a survey of 1,279 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is  $\pm 3$  percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,279 unless otherwise specified.

Response	Topline	Democrat	Independent / Third party	Republican	Black or African American	White	Latino/a
Some communities are more likely to develop asthma and other health problems because they are located closer to sources of air pollution. We need to place stricter limits on hazardous air pollution to help these communities.	65	86	65	43	85	61	70
We do not need to issue any more environmental regulations that are just another source of government bureaucracy and never result in any meaningful change.	27	6	26	49	10	31	21
