

DATA FOR **PROGRESS**

From September 9 to 13, 2022, Data for Progress conducted a survey of 947 likely voters in New York using SMS and web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ± 3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=947 unless otherwise specified.

[1] Would you support or oppose changing the building code to require businesses to install air quality monitors to detect and prevent outbreaks that could lead to pandemics?

Response	Topline	Democrat	Independent / Third party	Republican	Black or African American	White	Latino/a
