

DATA FOR PROGRESS

From October 14 to 18, 2022, Data for Progress conducted a survey of 1,095 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ± 3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,095 unless otherwise specified.

[1] Of the choices listed below, which do you think are the top three **most important** issues for a candidate for Congress to focus on?

— The coronavirus pandemic
