

DATA FOR PROGRESS

From September 2 to 8, 2022, Data for Progress conducted a survey of 795 likely voters in New York using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ± 3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=795 unless otherwise specified.

[1] How concerned or not concerned are you about each of the following:

— Climate change

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino/a

[9] Some New York State lawmakers have proposed ending gas in new construction projects.

This means that newly constructed residential and commercial buildings would not use gas boilers or furnaces. Instead, new buildings would be heated and cooled by energy-efficient heat pumps. In effect, no fossil fuels would be used in new buildings.

Do you support or oppose this proposal?
