

From November 11 to 14, 2022, Data for Progress conducted a survey of 1,213 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ± 3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,213 unless otherwise specified.

[1] Lawmakers in Congress recently passed the Inflation Reduction Act to lower costs for families. This bill invests in clean energy production, like solar and wind power, which will lower energy costs and reduce our dependence on foreign oil.

It also lowers prescription drug costs and health insurance premiums for millions of Americans. It is paid for by closing tax loopholes for corporations and the wealthiest Americans and will reduce the national deficit by at least \$300 billion.

Do you support or oppose the Inflation Reduction Act of 2022?
