

# DATA FOR **PROGRESS**

From October 31 to November 2, 2022, Data for Progress conducted a survey of 777 likely Republican primary voters in Florida using SMS and web panel respondents. The sample was weighted to be representative of likely Republican primary voters by age, gender, education, race, and geography. The survey was conducted in English. The margin of error is  $\pm 4$  percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=777 unless otherwise specified.
