

DATA FOR PROGRESS

From September 23 to 30, 2022, Data for Progress conducted a survey of 1,387 likely voters in Ohio using SMS and web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ± 3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,387 unless otherwise specified.

[1] In 2021, state lawmakers passed a budget that eliminated Ohio's top income bracket, reducing the amount of tax paid by high earners making more than \$220,300.

Would you support a new bracket on people making over \$250,000 and another bracket that increases tax rates on people making over \$500,000?
