

DATA FOR **PROGRESS**

From November 18 to 22, 2022, Data for Progress conducted a survey of 1,249 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

N=1,249 unless otherwise specified. Some values may not add up to 100 due to rounding.

[4] The U.S. Federal Reserve — the central bank of the United States — is responsible for setting interest rates. This year, the Federal Reserve has raised interest rates several times to help curb inflation. Which statement comes closer to your view, even if neither is exactly right?	The Federal Reserve should continue raising interest rates until they successfully curb inflation, even if it means more Americans will be unemployed.	20%	25%	20%	16%
	The Federal Reserve should stop raising interest rates because putting millions of Americans out of work is not the right way to combat inflation.	69	62	68	77
	Don't know	10	13	12	7
