

From November 22 to 28, 2022, Data for Progress, in collaboration with Public Power NY, conducted a survey of 1,210 likely voters in New York using SMS and web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,210 unless otherwise specified.

[1] How concerned or not concerned are you about climate change?

[14] In 2019, New York State passed landmark climate legislation mandating that 70% of its power generation would come from renewables by 2030.

Building on that, the proposed Build Public Renewables Act (BPRA) would mandate that the New York Power Authority (NYPA) conduct an annual review to ensure that New York State is meeting that mandate.

If the mandate is not on course to be met, NYPA would then build whatever renewable generation was needed to meet that 70% by 2030 State Law.

If passed, NYPA would also transform all State and Municipal energy infrastructure to 100% renewable energy by 2035.

Do you support or oppose the Build Public Renewables Act?

[17] The proposed Build Public Renewables Act (BPRA) would mandate that the New York Power Authority (NYPA) conduct an annual review to ensure that New York State is meeting its climate mandate.

If the mandate is not on course to be met, NYPA would then build whatever renewable generation was needed to meet it.

Do you think that the CEO of the NYPA should support the BPRA?

[18] Opponents claim that the Build Public Renewables Act (BPRA) sets an impossible standard for New York State and would put private companies at a disadvantage, hurting competition and resulting in worse options for consumers.

With this in mind, please select the most convincing statement from **supporters** of the bill as reasons to **support** the BPRA.

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino/a	Capital Region	Central	Finger Lakes	Long Island	Mid-Hudson	New York City	North Country	Southern Tier	Western
The New York Power Authority (NYPA) was formed in 1931 by Governor Franklin Delano Roosevelt who used it as the way to electrify New York State. Right now, the NYPA is blocked from building out new renewables. The Build Public Renewables Act would change this and expand upon FDR's legacy, ensuring that New York is a climate leader.	24	21	24	28	22	25	19	26	22	26	9	27	16	27	23	20	30	28	21	22	24	20
The Build Public Renewables Act includes training and relief for any workers who lose their jobs and ensures that labor protections for NYPA apply to contractors and subcontractors. Union leaders have called the labor language in the bill "exceptional," and the largest teachers union in New York State has endorsed it.	21	23	22	16	21	21	26	18	20	22	30	19	19	12	27	22	18	18	24	20	14	19
The Build Public Renewables Act would establish a program to offer all low and moderate-income households across the state - approximately one million households - discounted renewable energy up to a 50% discount.	39	36	44	41	42	36	38	40	43	35	45	38	44	40	34	45	45	31	36	46	50	45
The most recent UN report states that we have less than three years to pass substantive climate legislation. Passing the Build Public Renewables Act is an essential step for New York State if it is to be a climate leader in the United States.	16	21	10	15	15	18	17	16	16	17	16	16	21	22	16	13	8	22	18	12	12	15
