

# DATA FOR PROGRESS

From February 16 to 22, 2022, Data for Progress conducted a survey of 1,205 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is  $\pm 3$  percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,205 unless otherwise specified.

**[1]** Below is a list of potential executive orders President Biden is considering to lower drug prices in the United States.

Please say whether you would support or oppose each of the following executive orders:

— Allow the federal government to negotiate drug prices with prescription drug companies to lower the cost of essential drugs
