

From March 4 to 7, 2022, Data for Progress conducted a survey of 1,260 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,260 unless otherwise specified.

[1] How much have you read or heard about harm reduction programs? (N=639)

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	White

[8] Some lawmakers are considering opening Overdose Prevention Centers. These centers offer sterile supplies and controlled settings for people to use pre-obtained drugs under the supervision of trained professionals who can intervene in case of an overdose or another medical event, link people to counseling, and provide referrals to health and social services, including drug treatment.

Do you support or oppose opening Overdose Prevention Centers?

[9] In response to increased fatal drug overdoses during the pandemic, lawmakers are considering expanding the use of medication-assisted treatments for substance use disorder and addiction. These medication-assisted treatments allow doctors to prescribe and administer medicines that help a patient in recovery from drug addiction by reducing withdrawal symptoms.

Do you support or oppose expanding the use of medication-assisted treatment for substance use and addiction treatment?

[11] Last year, the state of Oregon decriminalized the possession of small amounts of drugs. Instead of being prosecuted, a person possessing small amounts of drugs will receive a fine (like a parking ticket). A person can get the fine waived if they participate in screenings from services like treatment, housing, mental health care, and employment.

Would you support or oppose a similar measure nationwide?
