⠿ DATA FOR *PROGRESS*

From April 22 to 26, 2022, Data for Progress conducted a survey of 1,179 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,179 unless otherwise specified.

[1] Which of the following comes closest to your view, even if neither is exactly right?

Response	Topline	Democrat	Inde-pendent / Third party	Repub-lican	Disabled household member	No disabled household member	Disabled	Not disabled
Masks should be required on public transportation because masking is still necessary to protect against the coronavirus, especially in overcrowded and poorly ventilated spaces like buses.	55	80	51	29	57	53	57	52
Masks should not be required on public transportation because the federal mask mandate was an overreach of government power and people can still wear masks if they choose.	40	13	43	66	39	40	38	41
