

From April 5 to 13, 2022, Data for Progress conducted a survey of 673 likely voters in Ohio using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±4 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=673 unless otherwise specified.

This report is for respondents: **OH**

**[1]** Which of the following comes closest to your view, even if neither is exactly right?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	White
Drug use and addiction is a public health issue.	81	84	83	78	83	79	82	81	80	84	81
