

DATA FOR PROGRESS

From January 21 to 26, 2022, Data for Progress conducted a survey of 711 young people ages 18-28 nationally using web panel respondents. The sample was weighted to be representative of age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±4 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=711 unless otherwise specified.

[4] Some lawmakers in Congress have proposed a new program called the Civilian Climate Corps (CCC). Members of the CCC will spend one year working on conservation, sustainability, public works, green infrastructure projects, and other climate-related efforts. Some of the benefits of the CCC include:

- Earning at least \$15 an hour with full benefits, including health care
- On-the-job training opportunities
- Assistance paying for school or student loans

Do you support or oppose the Civilian Climate Corps?
