

From May 5 to 17, 2022, Data for Progress conducted a survey of 745 likely voters in Pennsylvania using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±4 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=745 unless otherwise specified.

This report is for respondents: **PA**

**[1] Which of the following describes your current housing status?**

**[15]** State lawmakers are proposing the Whole-Home Repairs Act. The bill would create a state fund which homeowners and landlords across the state can access for home repairs and to make homes more energy efficient.

The bill would also provide funding to training programs and pre-apprenticeship programs so that the state has the necessary workforce to repair homes.

Do you support or oppose the Whole-Home Repairs Act?
