

# DATA FOR **PROGRESS**

From June 17 to 21, 2022, Data for Progress conducted a survey of 1,335 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is  $\pm 3$  percentage points.

N=1,335 unless otherwise specified. Some values may not add up to 100 due to rounding.

<p><b>[1]</b> Currently, the U.S. Department of Health and Human Services (HHS) reports data on "hospital-onset" coronavirus cases, which is the number of patients who contract the coronavirus while in the hospital. HHS reports the total number of people who get hospital-onset coronavirus in the U.S. HSS does not currently provide data on cases acquired at individual hospitals.</p> <p>When thinking about this, which of the following statements comes closer to your view, even if neither is exactly right?</p>	<p>HHS should report data on "hospital-onset" coronavirus cases for individual hospitals in addition to the total number of hospital cases in the U.S. . . . . . <b>66%</b></p> <p>HHS should not report data on "hospital-onset" coronavirus cases for individual hospitals and only report the total number of hospital cases in the U.S. . . . . . <b>19</b></p> <p>Don't know . . . . . <b>15</b></p>	<p>75%</p> <p>16</p> <p>9</p>	<p>61%</p> <p>19</p> <p>20</p>	<p>62%</p> <p>21</p> <p>16</p>
