

From May 24 to June 1, 2022, Data for Progress conducted a survey of 677 likely voters in Georgia using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±4 percentage points.

NB: subgroups with a n-size less than 30 (<30) are not shown on these cross-tabs. We choose not to display N<30 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=677 unless otherwise specified.

This report is for respondents: **GA**

**[1]** Have you or someone in your household been unemployed at any time since the start of the coronavirus pandemic?

— Yes, I was unemployed at some time since the start of the coronavirus pandemic

**[18]** A recent study found that, among Georgians who lost their jobs during the pandemic, Black residents were twice as likely as white residents to be rejected by the Georgia Department of Labor for unemployment benefits. When thinking about this study, which of the following do you believe is more responsible for that difference, even if neither is exactly right?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Voted in 2020	Did not vote in 2020
This is racial discrimination. Throughout Georgia's history, Black residents have always faced significant barriers to accessing public services and benefits as compared to white residents.	45	75	51	16	45	45	59	37	45	46	76	30	43	60
This is not racial discrimination. Black residents were denied at higher rates because they did not meet the criteria for receiving unemployment or submitted incorrect applications, not because of race.	41	16	28	70	39	42	28	48	41	41	7	56	45	10

**[19]** The Georgia Department of Labor is responsible for inspecting and ensuring that farmworker housing is adequate and safe. The Department is also responsible for reporting labor abuses faced by farmworkers to federal authorities.

A recent federal investigation of farmworker conditions in Georgia has led to criminal charges against a former official from the Department of Labor for conspiracy to force farmworkers into forced labor. News reports about the case indicate that hundreds of farmworkers were subjected to abusive conditions that included: human trafficking, forced labor, injury and death on the job, minimum wage violations, and overcrowded and unsanitary housing conditions.

Knowing what you know now, would you support or oppose stronger enforcement of labor and housing protections for Georgia farmworkers by the Department of Labor?

**[20]** The Georgia Department of Labor's State Monitor Advocate is the top state official responsible for protecting farmworkers in Georgia. Currently, the State Monitor Advocate is being investigated as part of the ongoing federal probe of farmworker conditions and human trafficking in Georgia.

To date, the State Advocate has not been criminally charged. The official's sister and a former Georgia Department of Labor official have both been criminally charged in the case for the human trafficking of farmworkers.

When thinking about this, which of the following comes closer to your view?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Voted in 2020	Did not vote in 2020
The Georgia Department of Labor should appoint a new State Monitor Advocate for farmworkers.	76	79	72	76	77	74	65	82	77	74	75	79	77	66
The Georgia Department of Labor should not appoint a new State Monitor Advocate for farmworkers.	13	12	13	13	13	13	21	8	11	16	9	11	13	10

# DATA FOR PROGRESS

From May 24 to June 1, 2022, Data for Progress conducted a survey of 135 likely voters in Georgia using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is  $\pm 8$  percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=135 unless otherwise specified.

This report is for respondents: **GA, Yes, my household member or I applied for unemployment insurance benefits**

**[1]** Did you or your household member experience any of the following when applying for unemployment insurance benefits? Select all that apply.

— Jammed telephone lines, problems accessing the web site, or closed unemployment offices
