

# DATA FOR **PROGRESS**

From June 30 to July 1, 2022, Data for Progress conducted a survey of 461 likely Democratic primary voters in Montgomery County, Maryland using SMS and web panel respondents. The sample was weighted to be representative of likely Democratic primary voters by age, gender, education, and race. The survey was conducted in English. The margin of error is ±5 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=461 unless otherwise specified.

[24] Some have proposed redesigns to roads with high injuries and fatalities, such as Georgia Ave and Rockville Pike, which would prompt changes including constructing more frequent crosswalks, adding bike lanes, adding bus-only lanes, installing street trees, and narrowing travel lanes to reduce speeding.

Do you support these changes to roads to prioritize safety over vehicle speeds?

**[25]** According to the Planning Board, the population of Montgomery County is expected to grow by more than 200,000 residents over the next 30 years.

To accommodate this increase in population, would you support the construction of new homes, including duplexes, townhomes, and/or apartments, **in your own neighborhood?**
