

From August 1 to 2, 2022, Data for Progress conducted a survey of 1,377 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ± 3 percentage points.

N=1,377 unless otherwise specified. Some values may not add up to 100 due to rounding.

[1] Some lawmakers in Congress have proposed the Inflation Reduction Act to lower costs for families. This bill will ramp up clean energy production, like solar and wind power, which will reduce energy costs and our dependence on foreign oil.

It will also lower prescription drug costs and health insurance premiums for millions of Americans. It will be fully paid for by closing tax loopholes for corporations and the wealthiest Americans. It will reduce the national deficit by at least \$300 billion.
