

# DATA FOR PROGRESS

From July 1 to 5, 2022, Data for Progress conducted a survey of 1,295 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,295 unless otherwise specified.

The Supreme Court should not be able to override settled precedent and public opinion to make decisions about the law of the land. The Court needs more limitations on its authority so it doesn't overstep its power.	54	78	50	34	58	51	62	51	53	56	70	51	61	59	51

No person or institution should be able to control the decisions someone makes about their own body. Overturning the right to an abortion means everyone faces the threat of the government policing their most personal decisions.	60	82	57	41	64	56	65	58	58	64	69	59	61	66	57
When it comes to protecting life, there should be no limit to the power that officials use to defend an unborn child. Offering the government power to control personal medical decisions is necessary to save lives.	29	10	27	49	24	35	24	32	31	27	19	31	28	26	33
