

## DATA FOR PROGRESS

From September 21 to 24, 2022, Data for Progress conducted a survey of 1,210 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is  $\pm 3$  percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,210 unless otherwise specified.

**[1]** Under existing civil rights laws, the federal government can require schools and workplaces to improve indoor air quality, like using air filters, to help protect higher risk Americans from COVID-19.

Would you support or oppose the federal government requiring schools and workplaces to implement indoor air quality improvements in their facilities?

**[2]** When thinking about the COVID-19 pandemic, which of the following comes closest to your view, even if neither is exactly right?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino/a	Disabled	Not disabled	Fox viewer (not OANN or Newsmax viewer)	Not viewer of OANN, Newsmax, or Fox	OANN or Newsmax viewer
Americans who are disabled, immunocompromised, have pre-existing health conditions, or are elderly are still at a higher risk of getting very sick from COVID-19.	70	84	68	57	71	68	63	73	66	77	67	70	71	71	68	60	77	46
Americans have done enough to fight and get past COVID-19 where everyone is safe from getting very sick, even if they were at a higher risk in the past.	25	12	25	37	23	26	33	21	28	19	24	25	26	24	25	32	18	48

**[3]** Would you support or oppose a proposal to create COVID-19 air quality safety certifications for public buildings? Similar to food safety letter grades posted outside restaurants (i.e. Grade A, Grade B), the certificates would be posted outside of stores and offices that have made improvements to indoor air quality, such as indoor ventilation upgrades and air filtration upgrades.
