

DATA FOR PROGRESS

From August 23 to 29, 2022, Data for Progress conducted a survey of 1,051 likely voters in Oregon using SMS and web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. Regional crosstabs were created by grouping respondents based on self-identified county. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 45 (<45) are not shown on these cross-tabs. We choose not to display N<45 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,051 unless otherwise specified.
